

Thornton-le-Dale Sediment Study

Public Zoom Invitation

Sedimentation and low flows in Thornton Beck have been a concern of residents in the village of Thornton-le-Dale for several years. In order to understand the issue in detail, the Environment Agency commissioned AECOM to undertake an independent research study to identify the sources and causes of sedimentation and nutrient deposition.

We are now pleased to share the report and its findings with the local community. We would also like to hear your views, and will be inviting you to join a number of virtual and in-person drop ins when Government restrictions allow.

Please join us on **Monday 5th July from 1300 – 1400** on Zoom to meet some of the team and to hear more about the report.

Join Zoom Meeting:

Meeting ID: **896 4391 3336**

Passcode: **Please email YorksCorrespondence@environment-agency.gov.uk to request a passcode ahead of the meeting.**

If you would like to submit a question in advance of the meeting, or request a copy of the report, please email us at YorksCorrespondence@environment-agency.gov.uk
